

BRAUN RESIDENTIAL SYSTEM ON FENNER ROAD, CAZENOVIA

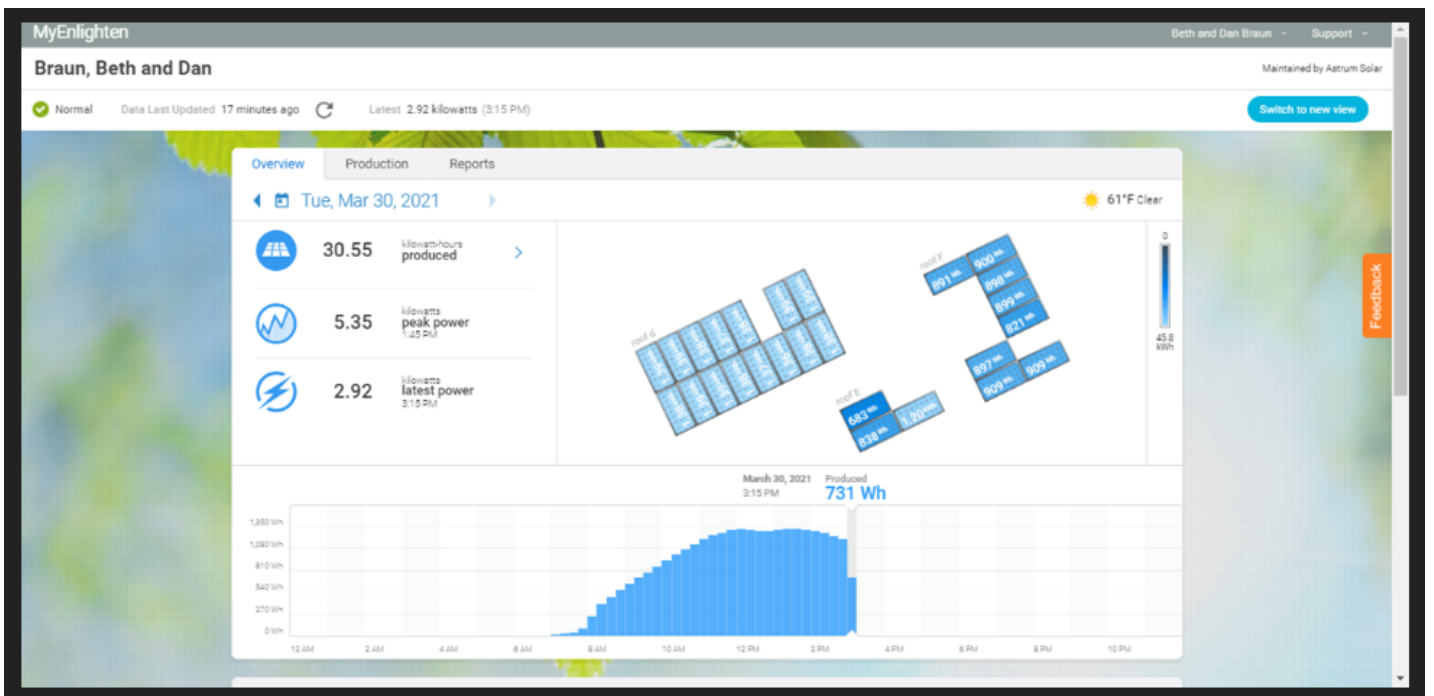

Installed in January 2016 - 26 panels for a max of approximately 10 kW on three different roof sections.

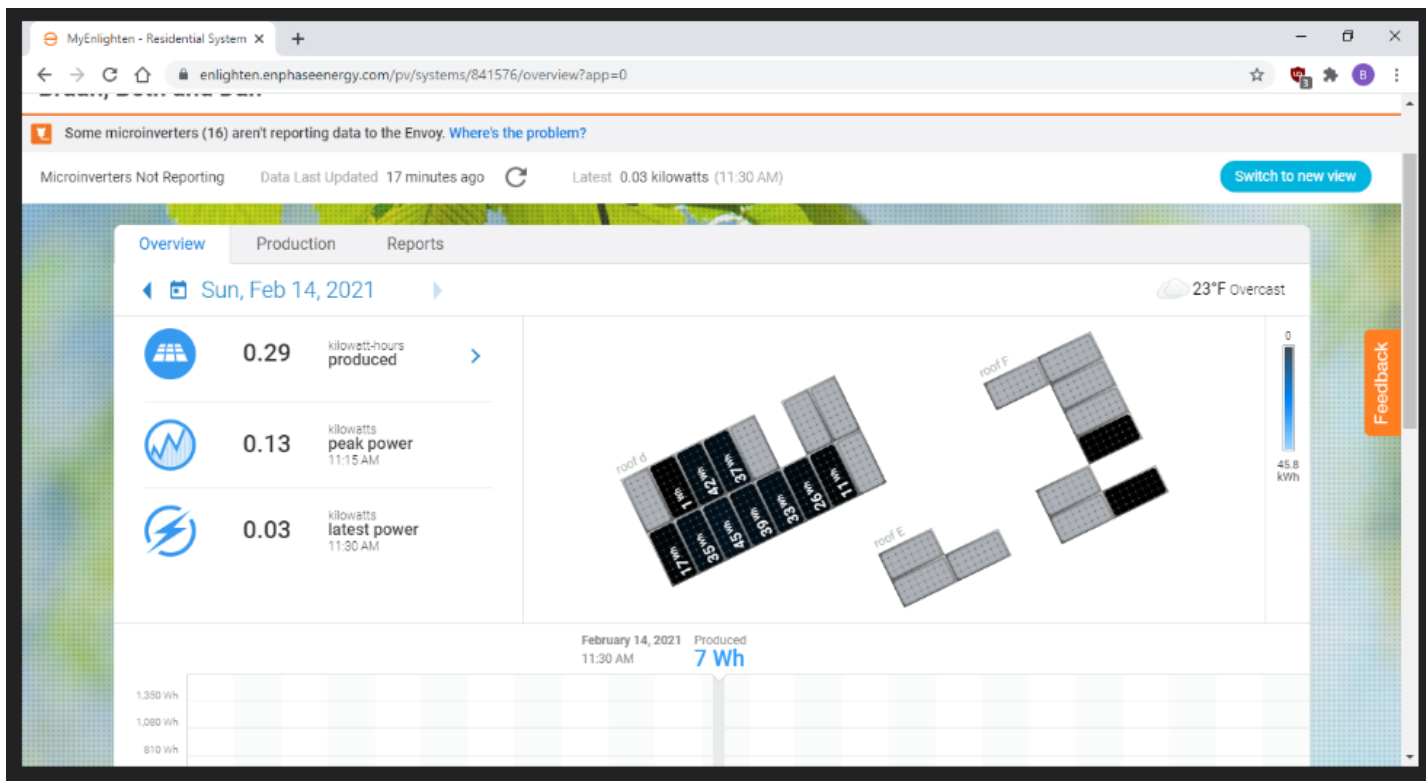

Could not use ground-mounted because of limited yard space

Panels are owned, not leased. Took advantage of renewable energy credits and financed the remainder at a very low rate. The panels have paid for themselves.

Snow is not removed in the winter but, even during a snowy January, the panels still generated electricity (see last graphic)
